Learning Method: Virtual Classroom

Introduction

Welcome to the Carbon Accounting Course

As organisations worldwide prioritise sustainability, understanding and managing carbon emissions has become crucial.

The Carbon Accounting course provides employees with the essential knowledge and skills needed to measure, report and reduce carbon footprints in line with global frameworks and standards such as Greenhouse Gas (GHG) Protocol and ISO 14064-1.

This course is designed for professionals across various industries who are involved in environmental management, sustainability and corporate responsibility.

Delivered either through live virtual sessions or on-site in a classroom environment, this course is structured in an ethical and objective manner in order to understand and calculate your organisation's carbon footprint using real-world data.

Who is the Course for?

The Carbon Accounting course is ideal for professionals involved in sustainability, environmental management and corporate responsibility. This includes:

- ▶ Sustainability Managers
- ▶ Environmental Officers
- ▶ CSR Teams
- ▶ Finance and Accounting Professionals
- ▶ Operations and Energy Managers
- ▶ Compliance Officers
- ▶ Supply Chain Managers
- ▶ Consultants.

It is also valuable for Executives and Decision-Makers who need to understand the impact of carbon accounting on business strategy and sustainability initiatives.

Course Key Facts

Benefits for Employers

- ▶ **Regulatory Compliance:** Employees trained in carbon accounting can ensure that your organisation meets local, national and international environmental regulations, helping you avoid fines and legal issues.
- ▶ **Sustainability Leadership:** Trained staff can lead sustainability initiatives, making your organisation a leader in environmental responsibility and enhancing your brand reputation.
- ▶ **Cost Savings:** By identifying and reducing carbon emissions, employees can help lower operational costs through energy efficiency, waste reduction and sustainable practices.
- ▶ **Risk Management:** Knowledgeable employees can better assess and manage environmental risks, protecting your organisation from the financial and reputational impacts of non-compliance or poor environmental practices.

Benefits for the learner:

- ▶ **Enhanced Expertise:** Gain specialised skills in carbon accounting, making you a valuable asset in your organisation's sustainability initiatives.
- ▶ **Compliance and Reporting Mastery:** Equip yourself with the knowledge to navigate complex regulatory landscapes.
- ▶ **Career Advancement:** Position yourself for career growth in the increasingly important fields of sustainability and environmental management.
- ▶ **Positive Environmental Impact :** Contribute to your organisation's efforts to reduce its carbon footprint and make a tangible difference in the fight against climate change.
